

THE COMMONWEALTH

STATE UTILITIES

State utilities were created and intended to provide a service and compliment towards the betterment of society. The very conception of a public utility is that it is not there to make a profit for a few; it is there to provide an essential service to the multitude. It was conceived for the people by the people, solely because all other means could not be entrusted to provide a fair and equitable service to all. (As in our constitution.)

Our utilities are supposed to be service-oriented and maintained on behalf of the community. How then will privatisation create cheaper electricity for a company that will need to make profit for its shareholders while charging less for their product as currently being charged by a supposedly self-sustaining utility that's in bad need of an overhaul? The price will go up. It will leave the reach of individuals and families to be able to afford. Charities shall become further swamped by the desperate.

The current failings and those to come are not the fault of the power service being a public utility! The blame lies solely at the feet of a Government which has contemptuously and deliberately allowed the utility to become inadequately maintained nor given the ability to keep pace with population growth, as it is with other utilities such as rail, hospitals, roads, water, agriculture, schools, etc, etc.

The people of NSW are not awake, nor understand and comprehend. The introduction of an extra bill each year to camouflage the inflated costs went unchallenged. The Liberals' solution to NSW disastrously dilapidated state will be to privatise all our essential services. This is of course the intended position of Labor. The Liberals will openly condemn Labor for NSW misery, but will still preference Labor ahead of One Nation. (The only Party committed to exposing and reversing their deceit.) Before and from 1997 no one wanted to know. Now, everybody affected is complaining!
